ABSTRACT OF THE DISCLOSURE

The invention relates to a method for managing and representing the memory content or a memory area of a data processing terminal and/or communication terminal or for representing the memory content or a memory area on the user surface (1) of a data processing terminal and/or communication terminal. According to the inventive method, the name or title of at least one user data object (3) contained in a DRM file (2) is represented directly on the user surface (1) of the data processing terminal and/or communication terminal together with the name or title of the DRM file (2) and/or the names and titles of other files (4) such as image files, audio files, or text files if available.
